About This Game

While on a patrol mission, Vera sees a thunderbolt hit the Elder Tree in the forest. Curious about the mysterious phenomenon—the sky is clear, after all—she approaches the location.

...wait, what is a catgirl doing there? And why does she claim to come from another world called 'London'? Everybody knows the world is called Morpheya.

A blend between visual novel and RPG

Hone your skills and slay monsters while discovering unsettling truths about Morpheya and its inhabitants (and, of course, the other 'London' world)!

Explore a lush pixel world, fight enemies in STB battles and see the story unfold in beautiful visual novel style sections, easily skippable for better replayability.

Are you looking for a challenge, or perhaps a more story-driven experience? You can change the difficulty settings any time while in game!

Quest driven narrative

Decide how much of the story you want to discover by completing over 100 story-rich quests: fight, collect, interrogate, choose.

Help or hinder side characters and see how your choices influence their lives--romance and more awaits you if you select the right options!

A cast of lively characters surrounds the protagonist in her mission to discover the truth about Morpheya.

Woo the catgirl Téa, enchant the elf Reniel, court the alchemist Sunny or flirt with the rogue Lyra in this yuri-exclusive game. Explore their romance or delve deep into their shared night in the H-DLC!

The three main characters that form your party have unique skills and mechanics that, when used together, devastate your foes.

Use the powers of charm as Vera: cast a variety of spells that render your enemies defenseless, or support your allies. Her spells improve the more you use them!
Switch between pure offense and pure defense as Reniel, but beware of the cooldowns and debuffs that keep this powerhouse in check.
Make use of your battle drops as Sunny to create powerful mixtures that can turn the tides of the battle.

English

Be afraid of the catgirl, not the ghost
Bring a food offering to the cat
Catnip the guildmaster into submission

That catgirl is wicked.
I don't want her to scare away this cutie...
